

Kitchen Remodeling: Cabinet Styles, Layouts & Finish Options

Remodeling a kitchen is one of the most rewarding home investments. Key decisions often revolve around cabinetry, layout, and finishes.

Cabinet Construction Styles

- Frameless (modern look, more interior space)
- Full Overlay (clean lines, traditional framing)
- Inset (flush-fit, precise, premium)

Door Styles

- Shaker, Slab, Raised Panel - each has a different visual impact.

Finish Options

- Paint-grade: poplar, MDF; clean and cost-effective.
- Stain-grade: hardwoods like maple or walnut for rich looks.
- Laminates: modern, cost-effective alternatives.

Hardware & Features

- Soft-close, pull-out trays, spice organizers - small details with big impact.

Layout Considerations

- Galley (efficient), U/L-shaped (open feel), Islands (multi-functional)

Final Thoughts

Your cabinets set the tone for the whole kitchen. Choose materials and styles that suit your home's design and your daily needs.
