

Trim, Moldings & Millwork: How the Details Complete Your Home

Trim defines the look of a space. Here are your main options:

Types of Trim

- Baseboards: Tall for elegance.
- Door/Window Casings: Simple or decorative.
- Crown Molding: Adds architectural detail.
- Wainscoting: Chair rails, wall panels for character.
- Coffered Ceilings: Custom depth and texture.

Material Options

- MDF: Paint-grade, smooth, affordable.
- Poplar: Durable and clean for paint-grade.
- Pine/Hardwoods: For stained, high-end finishes.

Paint-Grade vs. Stain-Grade

- Paint-grade is forgiving and clean.
- Stain-grade highlights wood grain, needs precision.

Custom Millwork

- Built-ins, mudrooms, fireplace mantels - function meets form.

Final Thoughts

Trim and millwork pull everything together. Choose styles and materials that fit your home's character.
